Internet Safety Tips

Practice safe Browsing.

Always keep personal information limited.

Keep your privacy settings on.

Practice safe browsing: Hackers and cyber criminals use enticing information or graphics to lure you into clicking on same. Avoid non-verified websites.

Always use a secure VPN connection

Malware can be disguised as an app: anything from popular games to other attractive offers and information.

Always choose strong Passwords: Strong passwords are harder to crack, avoid using simple password such as '1234', or 'Passwords',

Only make online purchases from secure sites.

Always keep your anti-Virus program up to date.

Remember to keep sensitive data such as banking information to a minimum on your device.

Never ignore warnings about unsafe websites.

As much as possible avoid using Public or free Wi-Fi
